DETAILED ACTION

Election/Restriction

1. Applicant's election with traverse of Group I, Claims 1-12, 18, 25, 29-30, 32 and 34, in Paper No. 8 is acknowledged. The traversal is on the ground that the Examiner has only identified two different classes and subclasses for the claimed subject matter and thus has not shown that there would be a serious burden if restriction was not required. This is not found persuasive for the reasons set forth in the previous Office action. Moreover, the several inventions are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by the different classification). The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Furthermore, the method groups are directed to different inventions which are not connected in design, operation, and/or effect. These methods are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone. Thus, it would be an undue burden to examine all of the above inventions in one application.

Art Unit: 1654

The requirement is still deemed proper and is therefore made **FINAL**.

Applicant is advised that the present application was transferred to Art Unit 1654. In view of the elected invention, Group I, the Office finds that an election of species requirement is deemed necessary as set forth below:

2. This application contains claims directed to the following patentably distinct species of the claimed invention: the distinct ingredients of Claim 1, namely an extract of the genus *Trichocaulon* or the genus *Hoodia*.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 3-12 and 14 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1654

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
